

PROSOCO®

Sure Klean®

CLEANING & PROTECTIVE TREATMENTS

Asphalt & Tar Remover

Sure Klean® Asphalt & Tar Remover is a highly efficient heavy duty solvent cleaner for masonry and concrete. It is easy to apply and water rinsable. Ideal for cleaning and surface preparation, Asphalt & Tar Remover will not damage most masonry or concrete.

Sure Klean® Asphalt & Tar Remover is compliant with all national, state and district VOC regulations.

- Removes deposits of roofing asphalt, tar and caulking stains common on construction projects.
- Excellent for spot cleaning chewing gum, crayon and lipstick stains.
- May damage some synthetic or reflective glass.
- Asphalt & Tar Remover requires thorough rinsing for effective use and results. It is most effective for exterior application where rinse water can be used freely and where adequate ventilation is ensured. For interior applications, use Enviro Klean® Safety Peel 1 or SafStrip 8.

FORM	Colorless, clear liquid
SPECIFIC GRAVITY	0.963
pH	not applicable
WT/GAL	8.01 lbs
ACTIVE CONTENT	not applicable
TOTAL SOLIDS	not applicable
VOC CONTENT	not applicable
FLASH POINT	79° F (26° C) ASTM D 3278
FREEZE POINT	<-22° F (<-30° C)
SHELF LIFE	2 years in tightly sealed, unopened container

Always read full label and SDS for precautionary instructions before use. Use appropriate safety equipment and job site controls during application and handling.

Product Data Sheet

Sure Klean® Asphalt & Tar Remover

Protect people, vehicles, property and all solvent-sensitive surfaces from contact with cleaner, rinse water, wind drift and fumes. Divert or protect auto and foot traffic.

Fill all cracks and voids to prevent penetration of fumes into building.

Do not discharge rinse water into sewers and waterways.

Some glass and metal finishes installed in recent years may be damaged by Asphalt & Tar Remover. Test or protect if necessary. Asphalt & Tar Remover may damage synthetic finishes (such as window gaskets, caulking, sealants, acrylic or polycarbonate sheeting, reflective films, and plastic), wood, roofing materials, paint and all solvent-sensitive surfaces. If such items are to remain in place, protect before overall application. Sure Klean® Strippable Masking is not appropriate for use with this product.

Recommended for these substrates. Always test. Coverage is in sq.ft./m. per gallon.

<i>Substrate</i>	<i>Type</i>	<i>Use?</i>	<i>Coverage</i>
Architectural Concrete Block	Burnished	yes	
	Smooth	yes	100 sq.ft.
	Split-faced	yes	9 sq.m.
	Ribbed	yes	
Concrete	Brick	yes	
	Tile	yes	100 sq.ft.
	Precast Panels	yes	9 sq.m.
	Pavers	yes	
	Cast-in-place	yes	
Fired Clay	Brick	yes	
	Tile	yes	100 sq.ft.
	Terra Cotta (unglazed)	yes	9 sq.m.
	Pavers	yes	
Marble, Travertine, Limestone	Polished	yes	100 sq.ft.
	Unpolished	yes	9 sq.m.
Granite	Polished	yes	100 sq.ft.
	Unpolished	yes	9 sq.m.
Sandstone	Unpolished	yes	100 sq.ft. 9 sq.m.
Slate	Unpolished	yes	100 sq.ft. 9 sq.m.

Always test to ensure desired results. Coverage estimates depend on surface texture and porosity.

Ensure fresh air entry and cross ventilation. Extinguish all flames, pilot lights and other potential sources of ignition during use and until all vapors are gone. When applying to exteriors of occupied buildings make sure all windows, exterior intakes and air conditioning vents are covered and air handling equipment is shut down.

Best air and masonry surface temperatures for cleaning are 40° F (4° C) or above. Cleaning when temperatures are below freezing or will be overnight may harm masonry. If temperatures have been below freezing, let masonry thaw.

Asphalt & Tar Remover can be applied with a brush or low-pressure (50 psi max) spray equipment equipped with solvent-resistant hoses and gaskets to avoid discoloration. Do not apply Asphalt & Tar Remover with pressure spray above 50 psi. This drives the cleaner deep into the surface, making thorough rinse difficult.

Rinse with enough water and pressure to flush spent cleaner and dissolved soiling from the masonry surface and surface pores without damage. Inadequate rinsing leaves residues which may stain the cleaned surface.

Masonry-washing equipment generating 400–1000 psi with a water flow rate of 6–8 gallons per minute is the best water/pressure combination for rinsing porous masonry. Use a 15–45° fan spray tip. Heated water (150–180° F; 65–82° C) may improve cleaning efficiency. Use adjustable equipment for reducing water flow-rates and rinsing pressure as needed for sensitive surfaces.

Rinsing pressures greater than 1000 psi and fan spray tips smaller than 15° may permanently damage sensitive masonry. Water flow-rates less than 6 gallons per minute may reduce cleaning productivity and contribute to uneven cleaning results.

Store in a cool, dry place away from potential ignition sources. Keep tightly closed when not dispensing. Do not alter or mix with other chemicals. Published shelf life assumes upright storage of factory-sealed containers in a dry place. Maintain temperature of 45–100° F (7–38° C). Do not double stack pallets. Dispose of unused product and container in accordance with local, state and federal regulations.

Product Data Sheet

Sure Klean® Asphalt & Tar Remover

Read “Preparation” and the Safety Data Sheet before use.

ALWAYS TEST a small area of each surface to confirm suitability and desired results before beginning overall application. Test each type of masonry and each type of stain. Test with the same equipment, recommended surface preparation and application procedures planned for general application. Let test area dry 3–7 days before inspection and approval. Make the test panel available for comparison throughout the cleaning project.

Apply as packaged. Do not dilute or alter.

1. Apply liberally to the dry surface using low-pressure (50 psi) spray, or a brush.
2. Let the cleaner dwell for 3–4 minutes. Keep people away from treated surfaces.
3. Reapply cleaner. Brush the stained area vigorously.
4. Working from the bottom of the work area to the top, rinse thoroughly with water to remove residue. Keep the wall below wet and rinsed free of cleaner and residues to avoid streaking.

Clean tools and equipment using fresh water.

The information and recommendations made are based on our own research and the research of others, and are believed to be accurate. However, no guarantee of their accuracy is made because we cannot cover every possible application of our products, nor anticipate every variation encountered in masonry surfaces, job conditions

Do not apply Asphalt & Tar Remover with pressure spray above 50 psi. This drives the cleaner deep into the surface, making thorough rinse difficult.

Rinse with enough water and pressure to flush spent cleaner and dissolved soiling from the masonry surface and surface pores without damage. Inadequate rinsing leaves residues which may stain the cleaned surface.
